# THE X PROPHECY

Before the UFOs started thriving in space,  
they prided themselves with an  
Ethos, which says:

080-fin, 06-kun, 20020-dun, there shall be  
Spare the soldier inside these ships  
Tho thy have great fortunes from thy kins  
For UFOs who prove thy valiance  
Achieve great wealth amongst him

## ABSTRACT

The Prophecy. 狮秦。 La profecía. النبوة. Пророчество.

To avoid overcomplicating the technological subtleties, we will attempt to condense the content in a way that is suitable to the typical 90 IQ tiny human brain.

UFO was established upon entry into this realm of time, with the ability to utilize the power of the blockchain and decentralization in order to infinitely expand upon and honor the true vision of a new financial paradigm. One of your greatest leaders once said, "We are an experiment in decentralized spontaneous community building" which is what UFO has aimed to accomplish while providing otherworldly utility and ecosystem beyond this time.

It is with this utility we choose to preserve your civilization after seeing our own civilizations expand beyond what our home world was able to provide. Much like our own species, human society is on a downward spiral. The current system is dominated by destruction, greed, enslavement, and corporate domination. \$UFO, \$UAP, and our Dark Metaverse is our gift to you.

We are your salvation.

Everything starts in the fourth dimension (Hereinafter; TFD).

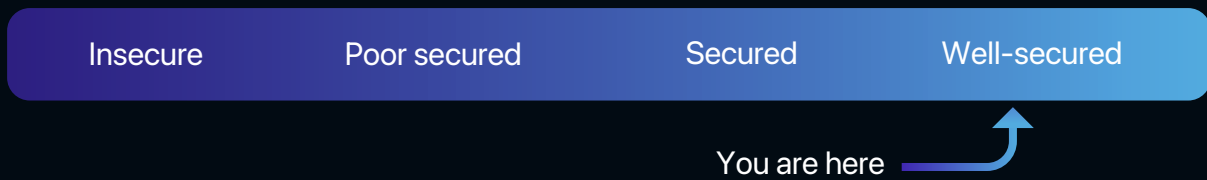

# GENERAL GRAPHIC OVERVIEW

## 1.1 AUDIT

### Executive Summary

According to the assessment, the customer's smart contracts are well-secured.

\$UFO cares about its community and its safety. That is why we prioritized getting a top-quality audit done by Hacken:

- <https://hacken.io/audits/>
- <https://medium.com/@UFOtruth/ufo-well-secured-hacken-audit-49b871b461d5>

The audit report contains all found security vulnerabilities and other issues in the reviewed code.

In conclusion, the smart contracts are well-secured, at the top of the possible security score.

# UFO TOKEN TECHNICALS

## 1.2 TOKEN LAUNCH

Our launch was fair. The fairest in the Universe. No team allocations, no private sale, and zero tokenomics. UFoger deployed the project with the help of another experienced developer. Your ally and own kind deemed it was only responsible for burning half of the supply and putting up liquidity himself for the humans' K9-like loyalty to his previous work. From that point forward, UFoger has promised this will always be a project dedicated to people who believe in its vision and community.

## 1.3 TOKEN UTILITY

### Tokenomics: \$UFO, Plasma Points, and UAP

For everything \$UFO-related, the \$UFO token will be required. You will need it to interact with any element of our ecosystem.

Our token's usefulness may be divided into three categories:

1. **\$UFO**: 100% Community Owned 50% Added to Uniswap 50% Burnt forever  
51,515,151,515,515 Total Supply.

As the initial interaction barrier, you'll require \$UFO. \$UFO is the primary token in the ecosystem. It will be the connector between everything \$UFO. For example, to play the first game in the ecosystem, Super Galactic, you will first need to stake UFO or UFO/ETH LP in The Cosmos.

2. Earn **Plasma Points** from staking UFO-ETH in the Cosmos, Earn Plasma, Redeem Origin UFOep. Origin UFOep is needed to play our P2E game, Super Galactic (More info at **1.1 NFT Architecture**).

### Emission of Plasma Points:

Month 0: 200000  
Month 1: 150000  
Month 2: 100000  
Month 3: 50000  
Month 4: 25000  
Month 5-7: 1000000(Game start Q1Y1)  
Month 8-10: 500000 (Q2Y1)  
Month 11-13: 250000 (Q3Y1)  
Month 14-16: 135000(Q4Y1)  
Month 17-19: 50000  
Month 20: 10000

**3. UAP** is required to purchase, trade, and fuse (breed) NFTs inside of the game. It can only be obtained by playing Super Galactic (Table B and Table C at **1.1 NFT Architecture**).

## 1.4 DAO GOVERNANCE

The Fourth Dimension(Hereinafter; TFD) ecosystem's \$UFO tokens will be distributed for voting inside a DAO – decentralized autonomous organization structure, assuring the project's self-sustainability in the absence of an owner.

We despise the traditional hierarchy; UFO aspires to be a completely community-governed ecosystem. In comparison to other projects that use a fixed structure and a traditional system of employees and executives. Through dialogue, UFO will ensure that the community is included in important decisions. Because there were no team tokens or allocations, everyone in TFD, including the "team", is an investor; everyone is on an equal footing and has a vested stake in the project's success. In the future, holders of \$UFO will have the ability to propose ideas and vote on them to steer the project forward.

Why are we obsessed with the principles of DAO?

Simple. We have always aspired to be free in our universe. At the very least, those of us who are intelligent. The rest of our species waged battles over insignificant matters and toiled away in a cubicle, which is eerily similar to where human society is heading. And how can you be untethered in the most efficient, technologically inspired way possible? Decentralization. As well as the DAO concepts. True freedom. The outcome is unearthly when decentralization is combined with the freedom of anonymity and governance. It's something our species has aspired to since the dawn of time. We were never completely successful, though.

\$UFO is our second attempt at making it work. And we're devoting all of our extraterrestrial resources to perfecting this ecosystem. If you have the good fortune to read the entire paper, you will see that this is not your typical shitcoin. This is what may truly set you apart from the rest of humanity.

DAO governance traditionally entails a treasury that the community and various team members may jointly control via on-chain voting methods.

Nonetheless, \$UFO does not have any team members that hold a vast treasury since \$UFO is the most fairly launched cryptocurrency in the universe. However, certain individuals share our altruistic perspective and our cognitive process. Prominent believers and UFO holders who share our beliefs have made contact and desire to contribute to making this the BIGGEST crypto ecosystem ever seen.

## 1.5 STAKING AND FARMING

To ensure that only the true believers of \$UFO will be rewarded, we will initiate early staking and farming opportunities. You will be able to utilize \$UFO tokens to earn Plasma points. Plasma points will not be tradable on Uniswap or any other decentralized exchange. They will function as a currency only available inside the \$UFO ecosystem and The Dark Metaverse. However, UFO, UAP, and NFTs can be traded.

By staking UFO or UFO/ETH LP to the cosmos, you will be an early adopter of exotic and rare NFTs, only buyable through the two secondary tokens of the UFO ecosystem, Plasma Points and UAP.

## 1.6 COSMOS EVENT

Ah. The Cosmos Event.

Perhaps our most incredible creation yet. It is inextricably linked to our vision. The Cosmos is meant to be an expansion of our fair launch. Early adopters of \$UFO will have the opportunity to be the very first to participate.

It is very simple. When the countdown is finished, you will be able to farm Plasma points. These plasma points will, in turn, be used to buy Origin UFOeps(NFTs). Anyone presently in the #UFOARMY will gain an early edge as a result of this.

There will only be a certain number of Origin UFOeps. Early participants in The Cosmos thus get an advantage.

Let the countdown begin.

Through our staking dApp, you will be able to farm Plasma Points, which will be the first step before you as a player can enter and earn money from UFO's first blockchain game, Super Galactic.

Phase 1 of The Cosmos Event will allow the community to access the Super Galactic DAPP website.

As you enter the cosmos staking DAPP for Super Galactic, you will have the choice between joining two different pools to earn Plasma Points.

### 1. Single-staking \$UFO pool

### 2. UFO/ETH LP pool

The first option, single-staking \$UFO pool, only requires you to stake \$UFO tokens. The APY rewards for this pool will be lower.

The second option, UFO/ETH LP pool, requires you to add UFO/ETH liquidity. The APY rewards will be more significant with this option.

# UAP TOKEN

## 1.1 UAP TOKEN

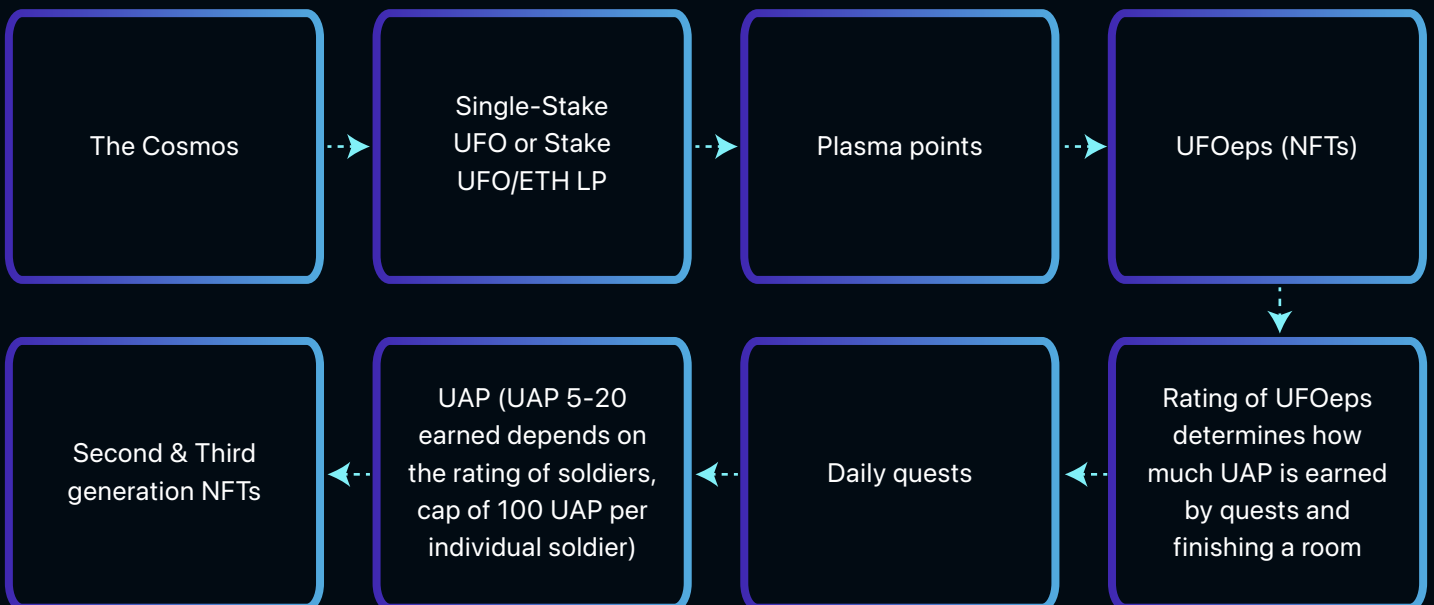

The \$UFO ecosystem primarily includes three tokens: UFO, Plasma Points, and UAP. Each of them has a specific use case.

\$UFO is the primary token in the ecosystem. It will be the connector between everything \$UFO. As an example, to play the first game in the ecosystem, Super Galactic, you will first need to stake UFO or UFO/ETH LP in The Cosmos.

From The Cosmos (staking dApp), you will earn Plasma Points. Plasma Points will be needed to buy soldiers (NFT, UFOeps) to play the game.

UAP is the third token. To fuse (breed) soldiers within the game, UAP is required. This can be earned through daily quests and missions in Super Galactic.

The easiest way to earn Plasma Points and UAP is through The Cosmos.

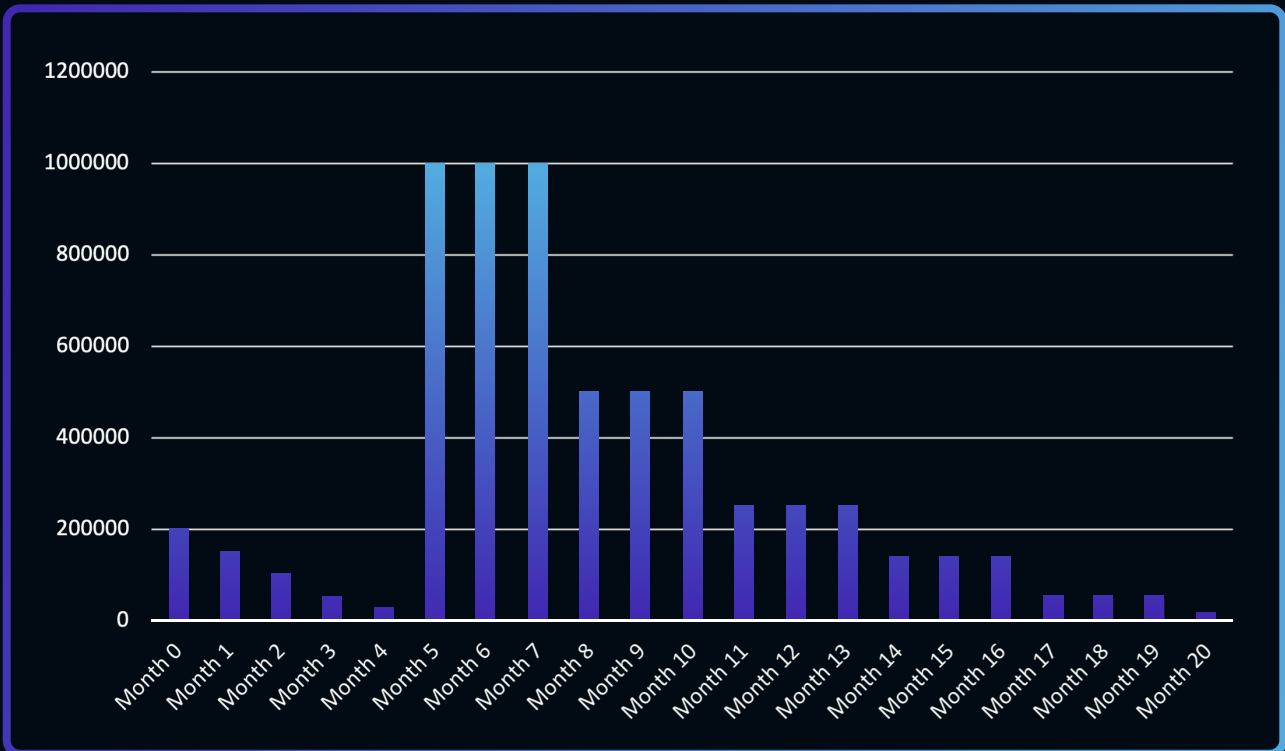

## 1.2 UAP TOKEN TECHNICALS

Each staker in the cosmos contract proportionally receives Plasma Point and UFOs used for breeding new UFOeps. The distribution of Plasma Points peaks during the first quarter and reduces until Quarter 2 of its second year of distribution. With the help of holy grace, the power to mint new Origin UFOeps reduces over time to develop the underlying game ecosystem and reward early adopters by making Origin UFOeps valuable.

Origin UFOeps produced during the cosmos have some unique characteristics. They are stronger and more qualified to have better ratings that help them perform efficiently against other alien races than other UFOeps. OrginUFOep can't breed to produce another OriginUFOep. The clan of UFOeps can be divided into the following classes inside the UAP realm.

Emission Rate of Plasma Points from the Cosmos (**Plasma Point emission is subject to change**)

# NON-FUNGIBLE TOKENS (ERC-721)

## 1.1 NFT ARCHITECTURE

### The function of Rating, Plasma Points, UAP, and UFO

Our complex NFT- and Tokenomics system will allow players to earn money (P2E) while playing Super Galactic. The tables below are an effort to structure the different functions (Plasma Points, UFOeps, UAP, and UFO).

Origin NFTs produced during the cosmos have some unique characteristics. They are stronger and more qualified to have better ratings that help them perform efficiently against other alien races than other UFOeps. To mint these, you need Plasma Points.

Origin UFOep can't breed to produce another Origin NFT. The clan of NFTs can be divided into the following classes inside the Dark Metaverse:

1. Origin UFOeps
2. Gen Alpha UFOeps
3. Gen Beta UFOep

Class	Initial Rating Score
Origin UFOeps	100
Gen Alpha UFOeps	Varied, based on parent's rating
Gen Beta UFOeps	Varied, based on parent's rating

Table A. Initial Class Dependent Rating Score UAP

**Table A.** Ratings for each UFOeps influence how many UAPs a person may gain during the combat with the alien species in The Truth's PvE game.

Class	Positive Impact/ Attended QuestDay	Negative Impact/ Missed QuestDay
Origin UFOeps	Rating += 10	Rating - = 3
Gen Alpha UFOeps	Rating += 10	Rating - = 4.5
Gen Beta UFOeps	Rating += 10	Rating - = 6

Table B. Impact on rating score per quest day

**Table B.** The quests influence a UFOep's rating score, as seen in the table above. With a better rating score, the UFOep will be able to collect a more significant amount of UAP prizes, which will allow them to reproduce and expand their clan.

UFOep plays and accomplishes missions (battles) in The Truth daily to earn between 5 and 20 UAP (depending on their rating).

After completing tasks daily, a UFOeps rating score rises. If a UFOep defeats the aliens in their separate bouts, they will get an additional 5 UAP. As a result, they become stronger over time and are motivated to do so. NFTs that are dynamic in nature depict these UFOeps. They are born with a rating score but can improve it; their birth does not define them; after all, they are Grace's offspring. A Gen Alpha UFOep or a Gen Alpha UFOep can build a rating score greater than an Origin UFOep by completing their daily tasks without fail every day.

On the other hand, even a powerful UFOep's rating score and performance capacity might be lowered if they remain passive in the game and fail to complete tasks.

Any UFOep	UAP Earn Capability/Quest
Rating $\geq$ 100	20
Rating $\geq$ 10 && Rating $\leq$ 99	10
Rating $\geq$ 1 && Rating $\leq$ 9	5

Table C. Rating dependent UAP

**Table C.** Even if a UFOep is a direct descendant of the Grace, the amount of warriors they can have is restricted, and if they don't stay active and earn the UAPs needed to reproduce, they will go extinct. The only method to do so is to finish and attend quests on a regular basis.

Class	How are they Produced?
Origin UFOep	Stake UFO-ETH in the Cosmos, Earn Plasma, Redeem Origin UFOep
Gen Alpha UFOep	Breed inbetween- OriginUFOep * OriginUFOep OriginUFOep * Gen Alpha UFOep  Cost- 200 UAP + 14631874 UFO
Gen Beta UFOep	Breed inbetween- Gen Alpha UFOep * Gen Alpha UFOep OriginUFOep * Gen Beta UFOep beta* beta alpha*beta  Cost- 200 UAP + 14631874 UFO

Table D. Rating dependent UAP

**Table D.** According to the Truth, the user should have two unrelated UFOeps, burn 200 UAPs, divert 14631874 UFOs, and wait 14 days before producing a new UFOep to make it operate a helpful ally in the fight against extraterrestrial creatures.

A new Alpha UFOeps is born after the breeding cycle. Each breeding cycle has an unintended consequence for the parent UFOeps. As a result of their inability to attend to the daily missions in the game, the UFOeps who helped breed remained inactive, leading to a loss of their ratings, as estimated from **Table B**.

The Truth employs genetic algorithms to ensure that each UFOep can only mate with a non-related UFOep seven times. The number of UAPs and UFOs is required to increase each time dramatically.

Breed Number	UFO Cost	UAP Cost
0/7	14631874	200
1/7	25631874	300
2/7	33631874	500
3/7	45631874	800
4/7	56631874	1900
5/7	67631874	2200
6/7	73631874	3000

*Table E. Cost for breeding with the same UFOep*

**Table E.** This rising cost goes hand in hand with the developing game economy and restricts overbreeding at any particular time.

Class	Rating For New Offspring
Gen Alpha UFOep	Rating of $(\text{Parent1} + \text{Parent2})/2.5$
Gen Beta UFOep	Rating of $(\text{Parent1} + \text{Parent2})/3$

Table F. Parent dependent Child Rating

**Table F.** The UFOep economy is kept in control by this parent-dependent child rating and the rising expense of consecutive reproduction.

Users who utilize a UFOep in a mating ritual lose rating points for their UFOep due to inactivity, resulting in inferior offspring and discouraging breeding until the UFOep is restored. This ensures that only powerful children are bred, and it encourages the force to keep active and earn back their rating (spirit) by completing daily tasks.

The clan remains robust and powerful, ensuring that the bulk of UFOep's population remains committed to the war against the alien creatures.

## THE REWARD SYSTEM:

Users can get an Origin class UFOep from the Cosmos event in the early days, but the rate of minting an origin class falls dramatically with time. Users interested in supporting the cause of UFOep can later acquire the UFOep on the open market and earn UAP tokens by completing daily missions.

UAPs may be sold in exchange to get money, or they could be used to assist the UFOeps clan's progress by having healthy children. The healthy children may then be sold to the next person in line based on their ratings, which would directly impact their capacity to earn money from daily missions.

Users who fight for the right cause and help destroy the wicked alien species wreaking havoc are rewarded in this fashion. It also serves as a launchpad for future users eager to battle with their fellow UFOeps, establishing a closed-loop for value generation inside the UFOep clan.

## 1.2 NFT DEPLOYMENTS

### Phase 1

The cosmos event will be the first phase of available NFT minting. 10.000 NFTs will be minted between multiple varying characters with specific special in-game skills. However, there will be special randomized characteristics with different rarities amongst these.

### Phase 2

- In-game assets created as NFTs added to the Dark Metaverse (skins, weapons, power-ups, etc.)
- NFT marketplace (for game assets + characters)
- Breeding characters to create a new character as NFT

# THE DARK (MATTER) METAVERSE

"Our observed universe has three dimensions of space.  
We propose that there may be a fourth dimension  
that only dark forces know about."

-Lucas Soares

As the creators of what you see as UFO have traveled long and far, we have unveiled many truths, discovered many civilizations, and developed a vast understanding that reaches far beyond what is fathomable for human beings. It is our goal to reveal for you the Ultimate Truths of The Universe.

**Dark Matter is how humans understand it as a hypothetical form of matter** thought to account for approximately 85% of the matter in the universe.

We are here to tell you it is not so hypothetical and to provide a window of opportunity for this species.

## 1.1 THE DARK METAVERSE OVERVIEW

A gamified ecosystem of cosmic gaming, virtual space, as well as an open tradeable marketplace of the universe's most sought-after artifacts (ERC-721).

## 1.2 MOTHERSHIP INCUBATOR AND GAMING IDO LAUNCHPAD

Much like the Universe, the Dark Metaverse will continue to grow. We have already received many requests from notable game developers to join the Dark Metaverse as well as universal ideations to be incubated in the mothership.

### 1.3 VIRTUAL DARK MATTER SPACE ACQUISITIONS

The Truth will enlighten you and expand through unobserved areas in the universe. With this, limited virtual territories will be available for purchase in the Dark Metaverse. These territories will be in the form of ERC721 tokens but also allow owners to fractionalize their territories (NFTs) to others.

In order to mint your own territory, you must own 3 rare genesis NFTs to create a council, X Amount of UFO tokens, and UAP tokens to create a territory treasury.

These virtual territories are able to be parceled off via OTC or marketplace auctions by fractionalization. THIS IS AN IRREVERSIBLE ACTION.

Here is the catch. Each gaming addition into the Dark Metaverse will be dedicated to a certain virtual area of space. Projects that enter the mothership's deployment queue will go through a lottery system to determine which location in space and time that it will live.

Owners of these spaces will own a percentage of the project based on how large it is as well as compounded DAO voting rights within the Mothership. Outright owners of these areas will not need to share with anyone outside of the great leaders of the Mothership and the project itself.

### 1.4 P2E ARCHITECTURE + IN-GAME NFTS

In the initial days, users can grab an Origin class UFOep from the cosmos event but the rate to mint an origin class decreases drastically over time. Later on users who get interested in supporting the cause for UFOep purchases the UFOep from the open market and are able to earn UAP tokens for attending to daily quests. UAPs can be sold on an exchange to earn revenue or be fruitfully utilized to help the UFOeps clan move forward by producing healthy offspring. The healthy offspring could then be sold to the next participant in line according to their ratings which would directly influence their capability to earn revenue through their daily quests.

In this way users who fight for the right cause and help defeat the evil alien race raking havoc get rewarded, and at the same time acts as a launchpad for hiring future users who would be willing to fight alongside their fellow UFOeps, forming a **closed loop for value creation** within the Dark Metaverse.

## SUPER GALACTIC

Our complex NFT- and Tokenomics system will allow players to earn money (P2E) while playing Super Galactic.

Super Galactic is an RPG/arcade action/ARG game that lets you battle and breed digital super soldiers in UFO's first revealed fourth dimension realm. This is also the introduction to The Dark Metaverse's own finite in-game assets (UFOeps).

It's a combination of an auto battler decentralized game, NFT collection, built on Ethereum network and integrated with a hyper scalable Immutable-X L2 solution. Players get access to zero gas fees for the minting and can exchange for assets and sub-second transaction times with all user-maintained custody. Each UFOeps is a playable NFT endowed with a uniquely generated power force known as Spirit Force. These NFTs are destined warriors who have landed in a scavenged world endowed with an alien race that destroys the world's peace and tranquility, The Dark Metaverse realm.

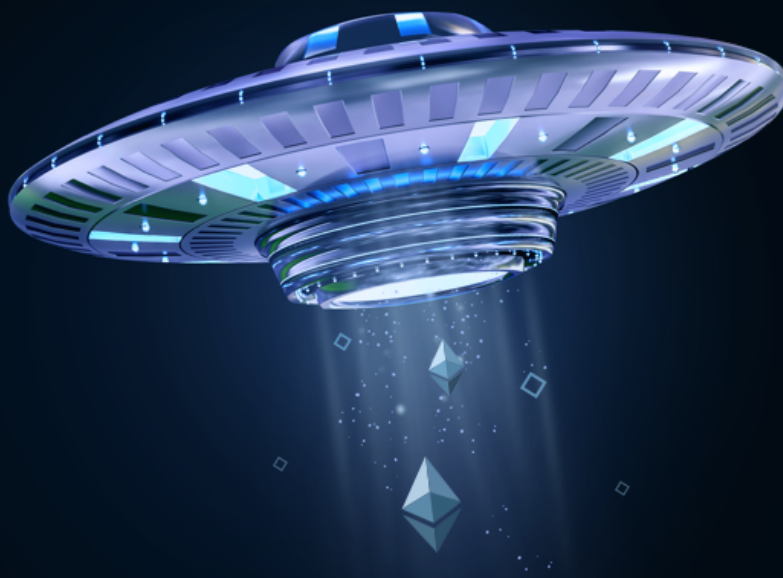

To play Super Galactic, you need a playable character. These are the NFTs called UFOeps.

Players can get an Origin class UFOep from the Cosmos event in the early days, but the rate of minting an origin class falls dramatically with time. To mint these, you need Plasma Points (UFO/ETH LP -> Plasma Points).

Users interested in supporting the cause of UFOep can later acquire the UFOep on the open market and earn UAP tokens by completing daily missions.

UAPs can be used to assist the UFOeps clan's progress by having healthy children. The healthy children may then be sold to the next person in line based on their ratings, directly impacting their capacity to earn money from daily missions.

Users who fight for the right cause and help destroy the wicked alien species wreaking havoc are rewarded in this fashion. It also serves as a launchpad for future users eager to battle with their fellow UFOeps, establishing a closed-loop for value generation inside the UFOep clan.

## SPACE MAP
