**Probinex - Announcement Channel EN**

📣 Dear community,

here's another batch of good news regarding the Operation Phoenix.

✅ It's great to let you know that we have already created a new smart contract for the new emission of PBX, which you can see here. What's more, the entire smart contract has undergone a successful audit by CertiK, a top-notch player in this field.

🏛️ It's a pleasure to be in a company of brands such as Binance Labs and PancakeSwap that have used the services of CertiK as well. Founded in 2018 by professors from prestigious Ivy League universities - Yale and Columbia - the company has a long record of successful cooperations.

🌐 Furthemore, discussion is now underway with the ProBit exchange to list the new PBX token!

As soon as we have more news, we will share it with you here.
