METADOGGE.

WHY METADOGGE?

Join MetaDoge and his friends as they explore the metaverse together. MetaDoge and friends are a collection of stakeable NFTs. You buy lootboxes which randomly give you an NFT. Higher rarity NFTs let you earn higher APY from staking. These NFTs can be sold our inbuilt marketplace. We are currently on season 2 of our NFT range which you can purchase from our dApp. There will be new collections released in the near future.

There is also a bespoke NFT collection for our top holders which includes a lottery feature.

We are implementing a bridge initially to the Ethereum network, however, in future we are open to bridging to other networks also. Ethereum has initially been chosen from feedback from our investors.

MetaDoge will implement a leaderboard system that generates experience points based on the duration of holding, referrals to the native token, amounts of buys and NFTs owned. You will be view people you refer to the system as your team; this is based on referrals used through our integrated swap.

The final piece of this exciting adventure is a metaverse game, where you can earn... Metadoge. Metadoge and his friends MetaKishu, MetaShiba, MetaFloki, MetaSamo and more, explore different realms on the hunt for treasures. You can buy exclusive NFTs which will be used in the game. In game there will be purchases for avators, power-ups, and cutomizable doge homes. You can make your perfect doge, in the perfect doge-house. What are you waiting for? Join us today.

METADOGE.

WHY METADOGE?

We see Pancakeswap as a start-up platform; you are investing in our vision; long-term we want to switch to a revenue model from the NFT Marketplace rather than from token taxes. We recognise for future growth it will be beneficial for the native token to remove taxes; as this will be a requirement for bigger exchange listings. We see the starting tax as a means to establish the token; long-term the real value is getting our name out there to the masses; and having our brand develop and evolve into the number one NFT staking and marketplace.

We are in the process of finalising partnerships with with other tokens; we believe in working in partnership rather than competition. The partnerships will be centered around benefits for both communities and be with “SAFU” teams. This will mean a certain level of transparency and security such as audit, KYC or doxxing. We will focus on working together strategically to benefit both communities and ultimately achieve visibility by hosting Ask-Me-Anything (AMAs), Twitter promotion, NFT cross-promotion, access to whitelist positions etc.

As of launch of V2, we are listed on BKEX and ZT exchanges; we are progressing with other exchange listings. A big focus of our marketing continues to be the Asian market as we value their investment; we believe in respecting cultural differences, but also working together to build a strong community, a strong vision and strong brand. All this will require work from all of our communities. This is why we have formed the international board of directors alliance; all of our communities will be heard and we will work with you; you are investing in our business; view yourselves as shareholders who have an input into the direction and decision-making. We will be hosting regular-AMAs in all our growing number of International communities. Our aim is to have quarterly reports that highlight what has gone well, the lessons learnt, feedback from the community and where our development and marketing focus has been and will be upcoming. For this we will host meetings on Zoom or Telegram (depending on quality), and give you the information to make informed decisions about your financial investments.

CORE VALUES

Transparency

We value ourselves on being transparent. I am sure you are asking why the core team hasn't doxxed yet to the community? For now we think the best approach is to KYC to audit company Certik as if anything untoward happens the auditors have all of our identity information and can report our team to the relevant authorities. We believe in sharing with you updates as and when we know about them; whether this is marketing or development we want to keep you the customer/investor informed. This is why we have taken the approach of doing AMAs based on the upcoming news about our latest plans for marketing and development in MetaDoge. We aim to continue this throughout the project by doing quarterly reports and meetings. Establishing a nominated board of directors; formed of our private sale investors and public investors post launch. Our community will very much shape the direction of our future as we keep expanding MetaDoge all over the world. There are various ways to give us feedback by submitting a suggestion through this [form](#) or ask any questions in our Telegram groups where admins are willing to help you out.

Utility

As much as our brand is important to us, we have developed an NFT marketplace and NFT staking, and are developing an ETH bridge and Metaverse game. For us it is quality over quantity. We believe that focusing on one main utility allows us to really focus on it and give it all our time and energy to make it a big success. It is important for us to perfect our usecase to stand out from the rest of the competition.

METADOGGE.

CORE VALUES

Growth

We aim to have constant growth which will be fulfilled through our roadmap and strong community building. We recognize that there is a need for developments to be released as we progress. We are committed to new technological development and keeping the investor updated regularly; in our professional quarterly reports we will show what is expected for that quarter. It is often asked about marketing and we know it is important to create brand awareness through various partnerships, exchange listings, and advertising. For that we have dedicated marketers who focus on targeting all the different crypto and NFT communities.

Creativity

Here at MetaDoge we value creativity by coming up with unique and cool ideas for our NFTs. It is important to stand out from other competitors and for us one of the ways is our design aspect with our NFTs for marketplace. By creativity we know there are as many ideas for NFTs as there are people! It means that we are always ready to hear out different ideas and take them into consideration while designing new NFTs for our community.

Community

We recognize that tokens at their base need a solid community who believe in their vision. The token itself is as strong as the community! Our way of building up community who are excited and happy to be in MetaDoge is through various competitions and community engagements through social media.

METADOGES

ROADMAP

1

Quarter 1 (1st October 2021- 31st December 2021)
